

The Self-Driving Company Brain

Gives AI agents and tools the company understanding they need to actually operate.

AI is becoming part of every company.

Now every company needs a Brain.

THE PROBLEM

Access $\neq$ Understanding

AI can access

 Documents

 Messages

 Tickets

 Databases

But it still doesn't understand

- ⊗ Why decisions happened
- ⊗ Who owns what
- ⊗ What was promised
- ⊗ What changed over time

?

Ask your best salesperson why a deal fell apart
— they know.

Ask your CRM. It won't.

Every AI agent starts from **zero.**

WHY NOW

AI is changing from assistant to worker.

Before

AI answers questions

Now

AI performs work

But every worker needs context. AI workers are no different.

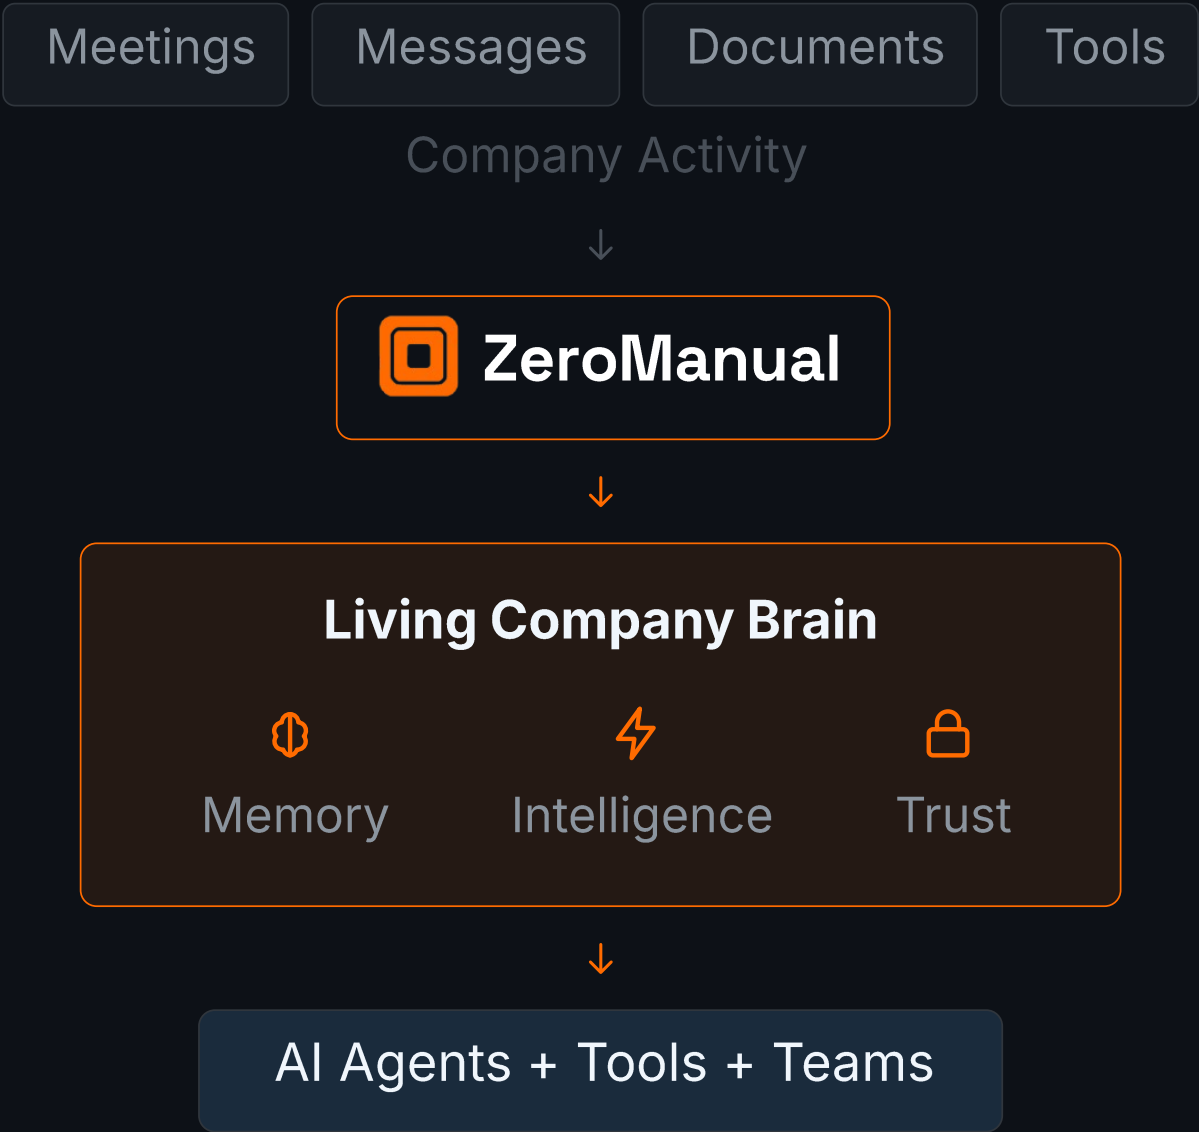

~~More model intelligence~~

Organizational understanding

- **Company Brain — an emerging AI infrastructure category**

Zero Manual = The Self-Driving Company Brain

The questions it can finally answer

- "Why did we choose this vendor?"
- "What did we promise this customer?"
- "Has this happened before?"
- "What should this agent know before acting?"

Context becomes **infrastructure**.

The Brain works where work happens.

TIER 1 · PRIMARY PRODUCT

Agent Context Layer

- Claude
- ChatGPT
- Internal agents
- Developer agents

Before acting, agents receive

- ✓ Past decisions
- ✓ Ownership
- ✓ History
- ✓ Constraints
- ✓ Commitments

Not a document dump — **a working memory of the company.**

TIER 2

Existing Tool Layer

- Slack
- Gmail
- CRM
- Internal systems

The right knowledge appears where work already happens.

TIER 3 · LOWEST PRIORITY

Company Brain Platform

Includes an **AI Consultant**

- Ask questions
- Analyze situations
- Review decisions
- Understand reality

The Brain matters most when it **powers work** — not when people manage another dashboard.

HOW IT WOULD LOOK

The same request, two worlds.

TODAY

AI Agent

"Please upload documents and explain the background."

🔄 Human repeats context. Again. Again.

No memory. Every session starts over.

WITH ZERO MANUAL

AI Agent

"Create a launch plan."

Company Brain provides

- ✓ Previous launches
- ✓ Owners
- ✓ Customer insights
- ✓ Past decisions
- ✓ Current constraints
- ✓ Lessons learned

No context upload. No repeated explanation.

AI starts with **company understanding.**

A NEW CATEGORY

Search finds information. Company Brain creates understanding.

Search Systems	Company Brain
Files	Organizational reality
Retrieval	Understanding
Static knowledge	Living memory
Answers	Intelligence

Company Brain requires

- Source
- Freshness
- Ownership
- Trust

The future isn't better search. It's
companies that understand themselves.

MARKET SHIFT

Every platform shift creates a new intelligence layer.

Starting with

AI-native teams

Startups

Enterprises

Every knowledge organization

As AI becomes a worker inside companies, **every company will need a Brain.**

AI workers create a new infrastructure market.

Three forces converging

- Enterprise AI adoption
- AI agents
- Need for company context

Every AI agent needs

- Context
- Memory
- Company knowledge
- Trust layer

AI Software
\$467B by 2030

AI Agents
\$52B+ by 2030

Knowledge Systems
Emerging

Company Brain — the missing intelligence layer for AI-native organizations.

The people building the Brain.

Company intelligence infrastructure.

Three growth channels

Subscription

Company Brain Platform

Recurring access to organizational intelligence.

- Company size
- Users
- Connected workspace

Pay per use

Intelligence consumption

- Usage grows with
- ✓ Context requests
 - ✓ AI agents powered
 - ✓ Memory operations

More AI work → more Brain usage

Enterprise

Large organization deployment

- Governance
- Security
- Integrations
- Private deployment

As companies depend more on AI, their **Company Brain becomes more valuable.**

WHERE WE ARE

Building the foundation for self-driving companies.

Built

- ✓ Company Brain architecture
- ✓ Organizational memory system
- ✓ Intelligence model
- ✓ Trust & governance layer

Now

 **Building first technical prototype**

Not raising.

Sharing early with people thinking about the future of AI-native companies.

Today companies use intelligence.

Tomorrow companies become intelligent.
